Galvanic Spa System II

What is a Galvanic Treatment?

For more than 50 years, spa and salon professionals have used gentle galvanic currents in customized treatments to refresh and energize the skin. These treatments, through a gentle massaging action, help to focus cellular energy and enhance circulation.

How does a Galvanic Treatment work?

Pre-treat

During the Pre-treat cycle, the Galvanic instrument and the Pre-Treat Gel are negatively charged. These negative charges repel each other, driving the Pre-Treat Gel into the skin. The Pre-Treat Gel binds to impurities deep in the skin.

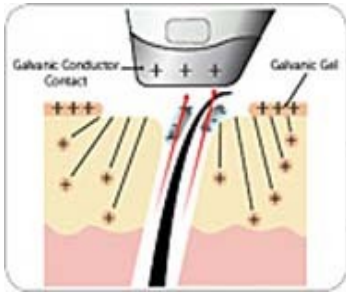

Treatment

During the Treatment cycle, the Galvanic instrument and the Treatment Gel are positively charged. These positive charges repel each other helping to deliver the beneficial ingredients to the skin, including the exclusive ageLOC ingredient blend. The positively charged instrument attracts the remaining negatively-charged impurities from the Pre-treat cycle, drawing them out of the skin.

SPA BEAUTY AT HOME

Treatment Gel - Positively Charged

Bring Spa Results Home

With the stress of modern life, spa treatments have become more than just occasional pampering, they are a requisite for looking and feeling great. The Nu Skin® Galvanic Spa® System II brings the day spa home to you. Using cutting-edge, patent-pending technology with the Galvanic Spa, no appointment is necessary to smooth lines and wrinkles, rejuvenate your complexion, revitalize your scalp and renovate your body.

For over 50 years, spa professionals have used galvanic current in customized treatments to refresh and energize the skin. Through a gentle massaging action, this current helps focus cellular energy and enhance circulation.

Now you can get these same beneficial treatments in the convenience of your own home with the Nu Skin Galvanic Spa System II.

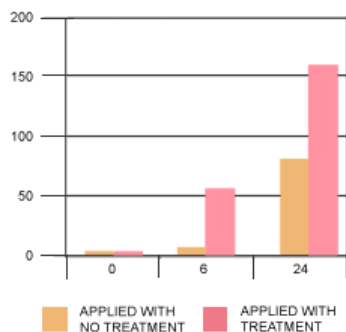

The Galvanic Difference

This patent pending, hand-held device uses self-adjusting, low level galvanic (electric) current to facilitate the transport of key ingredients into the skin for improved cleansing, hydration, circulation and radiance.

The gentle massaging action of each of the four attachments (face, treatment, body, scalp), combined with galvanic current, enhances circulation and draws vital nutrients to the outer layers of the skin.

Studies have shown that a Nu Skin Galvanic Spa II Treatment may enhance active ingredient delivery 70% or more for up to 24 hours post-galvanic treatment.

CLINICAL STUDIES

Skin Benefits Study

Research using an Iomed Phoresor Unit provides exciting new information. A recent study*, by a Nu Skin Professional Advisory Board Member, measured the ability of the galvanic current to help skin care ingredients enter the skin

Once the Galvanic treatment was concluded, measurements were taken at three different intervals. The first measurement was taken at zero hours, the second at six hours and the last measurement was taken at 24 hours after completing a galvanic treatment.

Active "A" is an active skin care ingredient found in one Nu Skin treatment product. You can see that at both 6 and 24 hours there is over a 70% increase in the ability of Active "A" to enter the galvanic-treated skin. Galvanic treatment increases absorption making active ingredients more available for skin improvement.

* Research study conducted at the University of Oklahoma, 2003

What is ageLOC?

LOOK YOUNGER WITH LOW arNOX LEVELS

HAVE YOU EVER WONDERED WHY WHEN IT COMES TO LOOKING YOUNG FOR YOUR AGE, TIME APPEARS TO STAND STILL FOR SOME, AND ACCELERATE FOR OTHERS?

Most of us know how important it is to protect our skin from the dangerous, skin damaging effects of the sun and environment, and we use the latest skin care technologies to try to repair and prevent signs of aging. So why do some of us still appear to age faster than we think we should?

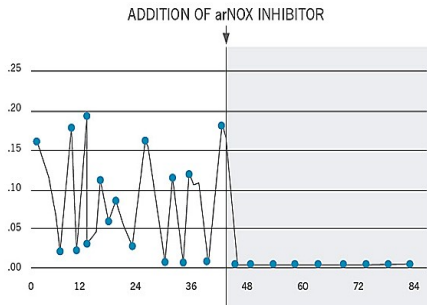

In a revolutionary skin care breakthrough, Nu Skin and Purdue University have unlocked the science behind the secret of why some people seem to look younger longer. And it's more than just good luck, it's good genes-and it's good news for you.

As we age, our personal levels of a newly discovered internal aging accelerator begin to increase. In fact, in a study conducted at Stanford University, results indicated that people with high levels of this aging enzyme can appear an average of seven years older than their biological age, while those with low levels can appear an average of seven years younger. That's because this internal source generates super skin-aging free radicals in the epidermis. And unlike the sun, there's no solution for stopping its damaging effects until now.

[Karma's Herbs](#)

Through exclusive research, Nu Skin has finally found a key to helping control your skin's destiny with Nu Skin Galvanic Facial Gels featuring ageLOC—a powerful aging antidote developed to help decrease signs of visible aging. Together with the Galvanic Spa® II, Nu Skin Galvanic Facial Gels give your skin an immediate, visibly younger appearance. Containing all the benefits of the original, Treatment Gel now provides the proprietary new ageLOC ingredient blend that helps slow an internal source of skin aging before it starts. Get results you can see now with benefits that last into the future.

Nicole Kidman enjoys regular face treatments with the Galvanic Spa. The result – impeccable tone and texture. Brad Pitt, 44, also swears by the “wrinkle iron”.

Ironing Wrinkles?
Yes! That is now possible due to an electric current that turns tired skin supple. With this clever gadget, now virtually everybody can iron their face. This pain free energy boost accelerates cell regeneration and the skin's metabolism. Proprietary gels are driven deeply into the skin's layers by galvanic current. After one treatment, the skin looks supple and ironed out. Galvanic Spa II from Nu Skin – Euro 340 or in a set with other revitalizing and anti-aging products for Euro 490.

Market Trends

Skin Care Industry - a huge expanding market

Baby boomers are one-third of the population

Shortly after World War II ended, one third of the world's population was born within an 18-year period. These individuals are now known as the "Baby Boomers". Market trends are changing and more than 76 million people in the US (9.8 million in Canada) are ready to buy their way to health, beauty, and wellness.

Who controls the wealth?

Now more than ever, the baby boomers of the 1950's are starting to see the signs of aging. They're looking for the right solution to achieve young, healthy looking skin. And they have the resources to do it - Baby Boomers control more than 70% of all the wealth and account for more than 50% of consumer spending.*

Skin care industry-a huge expanding market

Market trends show baby boomers have been heavy consumers for decades. From diapers to cars, this generation has impacted markets in all categories. Now more than ever, Baby Boomers are leaving their mark on the skin care industry. People are looking for skin care products to make them look and feel younger.

In recent years, skin care has become the most talked about and fastest growing segment of the personal care industry. The facial skin care market in the United States boasted sales of over \$6.7 billion and prestige skin care products generated sales of \$5.3 billion in 2004 with both segments showing continued growth in the industry. At Nu Skin we offer skin care and anti-aging products to fill the needs of today's consumers. People simply want to live better, longer.

The boom of entrepreneurs and home-based businesses

Downsizing, re-sizing, restructuring, technology - many jobs could be obsolete within a few years. The need for security and control has led to a rise in home-based businesses. "In the new economy the sheer quantity of compensation is no longer enough...we don't simply want money we want lifestyle."

Market Indicators

Baby boomer generation is pushing for anti-aging products

Baby boomers control 50 percent of consumer spending*

Every year in the US, consumers spend over \$12 Billion on skin care products^^

Approximately 50 million people in the US derive part or all of their income from self-employment.

Why Now?

Window of opportunity

When it comes to any business opportunity, timing is everything, and without a doubt, this is the right time. We know that Boomers control 50% of consumer spending and these boomers are about to add an additional \$1 trillion to our economy as they seek to preserve what they hold dearest...their Youth.

We are now living longer than ever before, and looking for a way to preserve our youth.* Nu Skin® provides products that meet that need, as well as the tool to measure and guarantee results, like the ProDerm Skin Analyzer.

Skin care sales increasing at double digit rates:

Nu Skin and the anti-aging product markets are approaching the hotspot of a rising growth phase. Baby Boomers are increasing their demands for healthy, young looking skin. These demands are a driving force, in which product sales of anti-aging products are predicted to skyrocket. Sales of skin care products in 2004 were some \$6.7 billion in the US alone, and have been "growing at double-digit rates."^^ The timing is just right for incredible growth and peaks in product revenue.

Living by the Universal Laws
Universal Laws

People who have accessed their spiritual code are more evolved, have learned more of life's lessons, have more self-understanding, and higher levels of perception. They are wiser, they have a level of maturity, harmony, and perfection in their thoughts and actions. They spend their lives trying to create peace; they have reconnected to the divine part of themselves and live accordingly. These people are aware of the Universal Laws, which help in spiritual growth and help the soul reach Nirvana, immortality, and release from karma.
